A *PCC* Company

**WYMAN  
GORDON**  
A *PCC* Company

Precision Castparts Corp. (PCC), based in Portland, OR, now offers a full line of fittings with their recent acquisition of fittings manufacturer Hackney Ladish. Hackney Ladish will become part of the Energy Products Division of PCC's Wyman Gordon Forgings WEST operations.

Additionally, Hackney Ladish is pleased to announce that they now offer a full line of chrome fittings in grades P5, P9, P11 and P22 as well as heavy wall fittings in carbon and low temp steels. As with our current carbon and high-yield fittings, these new offerings are available in a wide array of sizes from 2" to 48".

Wyman Gordon will support these applications by providing raw material for manufacture of fittings when required for critical delivery needs. Please contact your sales representative or call 800.527.4500 for additional details or to place your order today!
